

Getting Started with the EiDA Interface

This guide should help you efficiently navigate and utilize the platform's features for accessing lists, viewing item information, launching treatments and visualizing the results. If you need further assistance, please refer to the DH Team 🧑.

Working with existing data

Items

A screenshot of the EIDA Admin Home dashboard. The top navigation bar includes links for Manage users, Manage documents, Computer vision tasks, and a log-in status for Jade Norindr. Below the header, a central block displays a "Main Entities" section with three items: Witness, Series, and Work, each with an "Add" button and a "List" button. To the right, a message box says "Welcome to the administrative interface, Jade Norindr!" and "Dear user," followed by a note from the DH Team about the website being a work in progress. A "Log out" button is located in the top right corner of the dashboard area.

Navigate to a list of elements:

- Once logged in, locate the different menus on the dashboard.
 - The Nav Bar on the top of the page
 - A central Block
- Click on the "List" option from one of them.
- You will be redirected to the list page, where you can see all available Witnesses, Series or Works.

The IIIF logo takes you to the Witness's manifest.

Click on the ref. to change metadata linked to the item.

A screenshot of a witness item page. At the top, there is a small thumbnail image of a manuscript page. To its right, the text "Témoin # Bibliotheque nationale de France | gr. 2389" is displayed, followed by a "Public" status indicator. Below this, a timestamp "sziege 2024-02-13 16:16" and a "Afficher les régions" button are visible. A navigation bar at the top right shows pages 1, 2, ..., 5. The main content area contains the following metadata:

| | |
|------------------|--------------------|
| Cote | gr. 2389 |
| Oeuvre | Ptolemy Almagest |
| Lieu de création | - |
| Dates | 801-900 |
| Nombre de page | 376 ff. |
| Langue | Ancient grec |

On the far right, there is a "Ajouter à la sélection" button.

A screenshot of another witness item page. The header information is identical to the first one: "Témoin # Bibliotheque nationale de France | gr. 2389", timestamp "sziege 2024-02-13 16:16", and "Public" status. The "Afficher les régions" button is also present. The main content area shows the same metadata as the first page. On the far right, there is a "Ajouter à la sélection" button. In the bottom right corner of the page, there is a blue button labeled "Sélection (0)".

The 'Regions' button allows you to view the predictions from the treatments applied to the Witness.

The 'Add to Set' button will add the witness to your personal set.

A screenshot of a list page showing multiple witness items. Each item has a "Retirer de sélection" button (with a bookmark icon) on the left and an "Ajouter à la sélection" button (with a bookmark icon) on the right. The list consists of several rows, each with a similar layout.

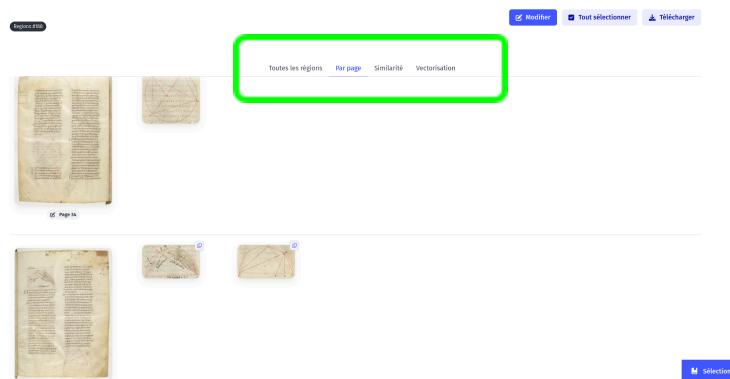

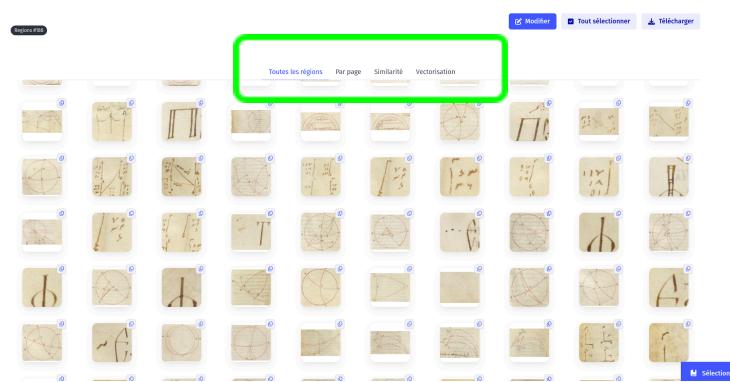

OR Click on "Selection" to manage your Set ([more details here](#)).

A screenshot of a "Selection" page. It features a large blue button in the center labeled "Sélection (1)". Above this button, there is a "Retirer de sélection" button (with a bookmark icon) and an "Ajouter à la sélection" button (with a bookmark icon). The background is white with some faint horizontal lines.

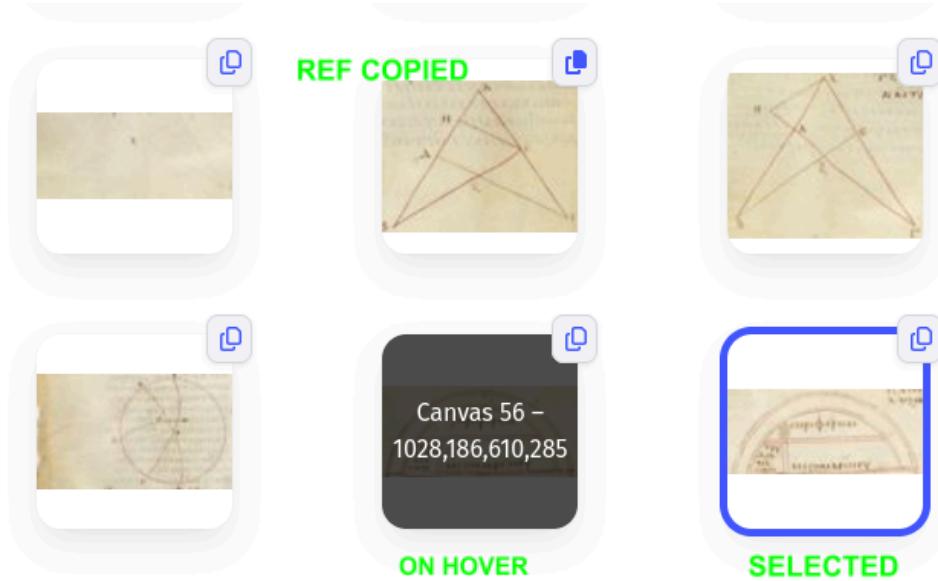

Visualize Predictions

Extraction

- Navigate to the “Regions” section  [Afficher les régions](#)
- You will be redirected to the *Regions* page, where you can visualize the results of the diverse Treatments applied on the Witness of interest.
- Switch between the *dump* view and the *per page* view. Clicking on the page will lead you to the Mirador viewer.

- Hover the diagram crop for the canvas number and the coordinates
- Click to create a selection of diagrams on which you want to apply Treatments (e.g. Export)
- Copy the ref. thanks to the icon on the top right of the image

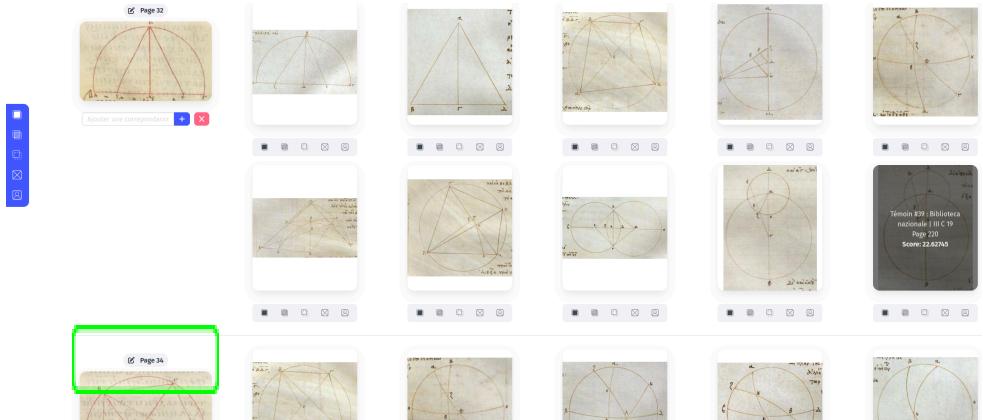

Export Results

- Select
- Click on the "Download" button.
- Follow the prompts to download or save the region's crops.

Similarity

- Navigate to the "Similarity" tab
- You have all the witnesses for whom similarities have been calculated with the current witness. Select at least one of them to visualize the 10 best similarity results.

- Hover on the image to get the ref. and metadata
- Clicking on the page number leads you to the Mirador Viewer

Vectorization

EIDA Manage users Manage documents Computer vision tasks Logged in as Jade Norindr Log out

“Bibliotheque nationale de France | gr. 2389” regions

Regions #188

All regions Per page Similarity Vectorization

1 2 ... 5

1 - 49 / 232

Selection (0)

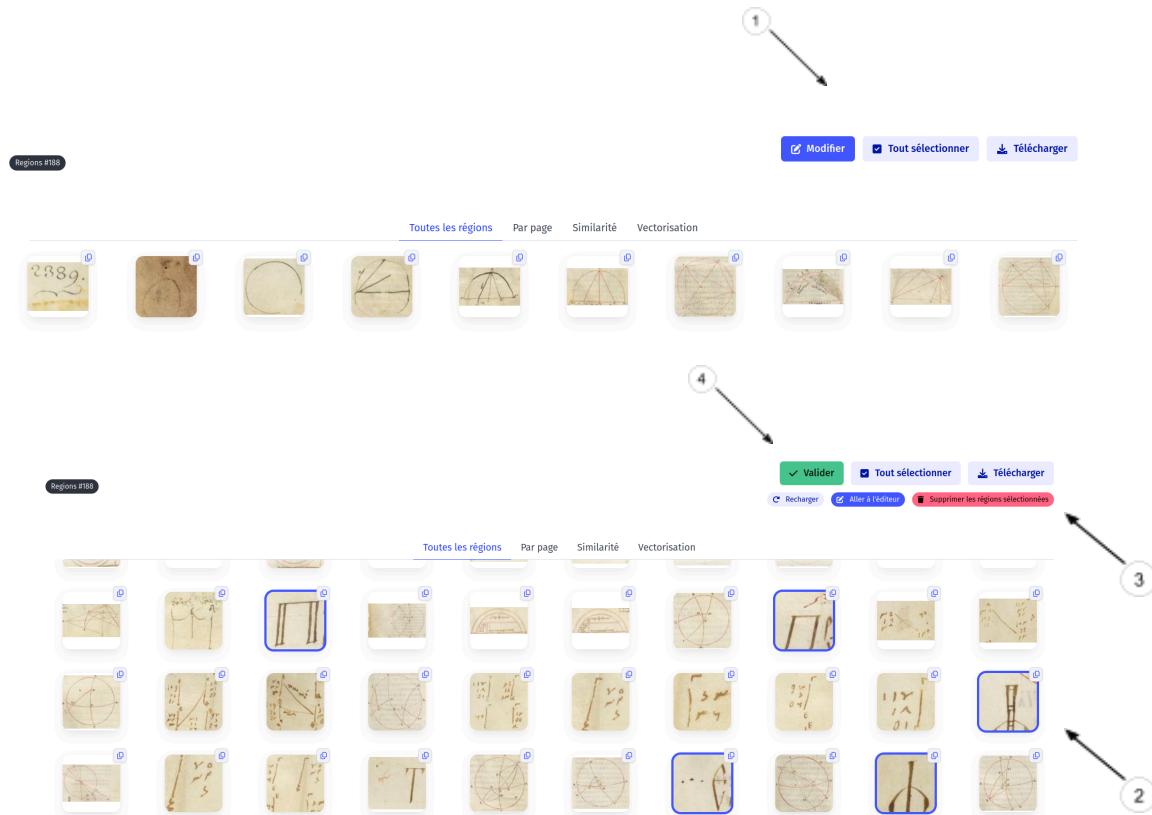

- Click on the Vectorization tab to view the vectorized diagrams
- For now, you can only visualize them as such, and hover the images to see the original JPEG image

Correct Predictions

Extraction

- (1) Click on “Edit” to open the set of commands
- (2) Select the annotations you need to delete
- (3) Click on “Delete”

- (4) Click on Validate

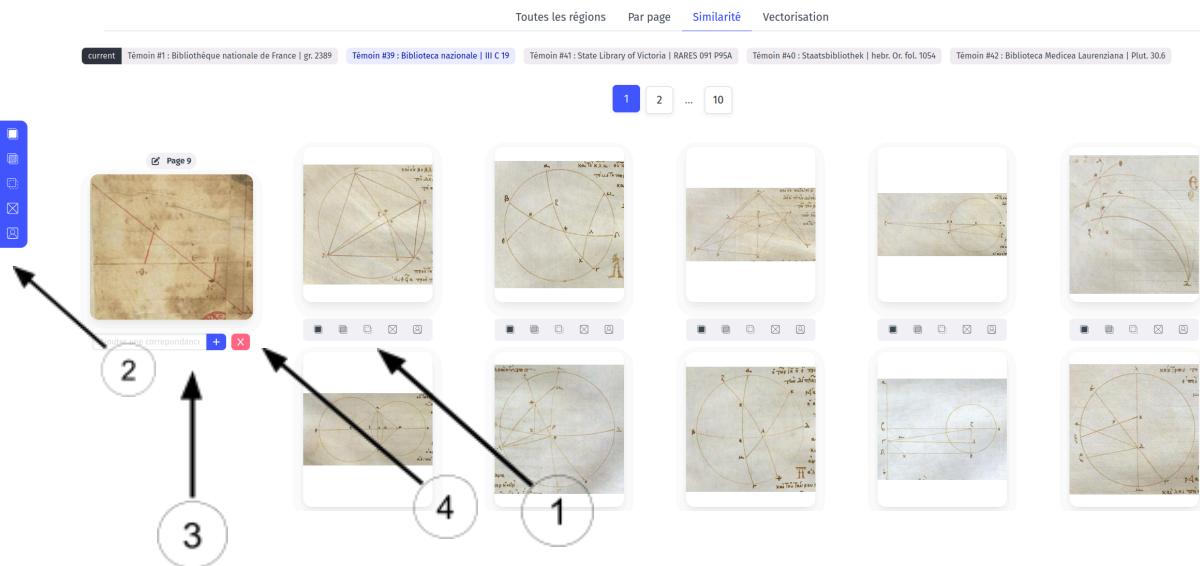

Similarity

- Annotate with the similarity category beneath each image (1)

Reminder:

| | |
|--|----------------|
| | Exact Match |
| | Partial Match |
| | Semantic Match |
| | No Match |
| | Personal Match |

- You can then choose to hide or display categories on the Side Menu (2)
- Paste [the reference of an image](#) in the text box to add it to the similarity results (3)
- Click the red cross to indicate “no similarity for this image”(4)

New Data and New Treatments

Add Witnesses / Series

The screenshot shows the EIDA Admin Home page. At the top, there is a header with the EIDA logo, a user icon, and links for 'Gérer les utilisateurs' and 'Gérer les documents'. Below the header, a message says 'Bienvenue sur l'interface Admin Clara Grometto !'. A central block titled 'Entités' contains three rows of buttons: 'Ajouter' and 'Lister' for 'Témoin', 'Série', and 'Œuvre'. On the left, there is a sidebar with the word 'ACTIONS' and two buttons: 'Ajouter Un Témoin' and 'Ajouter Une Série'.

- On the homepage, you can access the Witness Form through the side menu and the central block (“Add”).

- Enter Metadata
- Click Submit

Launch Treatments

The set

- Select the Witnesses, Series and Works in the lists
- Click on “Selection” on the bottom right
- Manage your Document Set

Regions sélectionnées (4)

Témoin

- #1 Bibliothèque nationale de France | gr. 2389
- #4 Bibliothèque nationale de France | Lat. 7214
- #5 Bibliothèque nationale de France | Lat. 16211
- #8 Bibliothèque nationale de France | gr. 2925

Vider la sélection **Sauvegarder la sélection**

You can consult your sets in Manage documents > Document Set

⚠ To manage a previously saved Set, go to Manage documents > Document Set and click on the “Load to selection” button

Load to selection

Your set will appear in the “Selection” tab on the bottom right. You can add or delete documents through the list interfaces.

Treatment Form

- ⚠ Computer vision tasks are not launched automatically anymore.
- ⚠ To launch a Treatment on an individual document, you still need to select it and save your selection – the document will then be available for treatment (its title will be displayed in the set list in the form).

Once your set is saved, you can perform a Treatment on it:

- In the selection popup, click on “Go to treatment”

- OR go to Computer vision tasks > Treatment > Add

The screenshot shows a dark-themed form titled "Add new treatment". It has several input fields: a dropdown menu for "Task type", a search bar for "Document set", a checkbox for "Notify by email" (which is checked), and a "Submit" button at the bottom. There is also a small note below the search bar: "Send an email when the task is finished".

Add new treatment

Task type

Document set

Notify by email

Send an email when the task is finished

Submit

- In the form, select the **task** you want to perform (Regions extraction, similarity search, vectorization), and the **document set** you want the task to be performed on.
- You can ask to be notified by email when your task is done running.

 You can only request tasks on your own document sets

 You need to have regions extracted for the similarity and vectorization to launch
